Type HN - Connectors and Adapters

After looking at this page dedicated to our type HN connectors, BE CERTAIN to visit our main [RF connector and adapter page](http://www.mgs4u.com/RF-adapters.htm), here: <http://www.mgs4u.com/RF-adapters.htm> Our main page has hundreds of hard to find types and combinations, including adapters for reverse polarity, GPS, and Wi-fi applications! Again, all top quality, and lowest prices!

Max-Gain Systems, Inc. is proud to offer an assortment of hard-to find type "HN" connectors and adapters for sale.

The type "HN" is an impedance matched (50 ohm) connector series that is weatherproof and rated for use from DC to 4 Ghz. It is basically a larger, somewhat higher-power version of the more familiar type "N". The insulation is rated at 5000 volts RMS, and the series has a rated working voltage of 1500 volts peak. ONE CAUTION: The type HN closely resembles the much less frequently encountered type "SC". These two series will NOT mate.

Note that the Teflon insulation of the type "SC" is somewhat conical in shape, tapering to a smaller diameter as it comes to its end.

The Teflon insulator of the type HN is cylindrical, with constant diameter along its entire length.

Most of these are "removed from military equipment", and therefore are top quality, mil-spec types! All are guaranteed to be in very good, serviceable condition, and are always guaranteed to your satisfaction. We offer refund or exchange (less only shipping and packing) on ALL of our connectors and adapters if not delighted, for any reason!

NOTE: Not all of these connectors / adapters are available at all times. While we do obtain them on a recurring basis, their availability should be verified before ordering. ([Click on link to see pictures.](#))

Stock number	Description	Price (each)
HN-01	HN female, 4-hole panel mountUG-496/U	\$4.00
HN-01a	HN female, single hole, panel mount	\$5.00
HN-10	HN female / C male(RARE)	\$9.00
HN-13	HN male, 50 ohm termination	\$8.00
HN-17	HN female, 50 ohm termination	\$15.00
HN-18	HN female, cable end (RG-8) 4 hole panel mount	\$9.00
SC-female-01	type "SC" female, single hole panel mount	\$5.00
SC-female-02	type "SC female, 4 hole panel mount	\$5.00

Our customers have told us that the following terms have legitimately helped them find us, and the products that we index and sell on this page. If you have an idea of another term you were looking for where that need would be legitimately satisfied by goods indexed or found on **this page only**, please let us know. Please be very selective in suggesting additional terms for this section. We want potential customers to be able to quickly and easily find us, but under no circumstances do we want to "spam" anyone with unrelated search results!
